Profile

Software Engineer with 4 years of experience building web, mobile, backend and AI products. Comfortable owning features end-to-end, from API and database design to frontend and deployment. Has worked with clients across 7+ countries.

Technical Skills

Languages: Python, JavaScript, TypeScript, Dart, Go, SQL, HTML5, CSS3

Mobile: Flutter, Dart, Firebase Cloud Messaging, State Management (Bloc/Provider/Riverpod)

Backend: FastAPI, Node.js, Express.js, Supabase, Firebase, REST APIs, WebSocket, Redis

Frontend: React, Next.js, TanStack Start, Tailwind CSS, Vite

Databases: PostgreSQL, MySQL, MongoDB, Firestore

Cloud & DevOps: AWS (S3), Docker, Vercel, Render, DigitalOcean, Git/GitHub, CI/CD

AI & APIs: OpenAI API, Google Gemini API, LLM Integration

Payments: RevenueCat, Razorpay, Paddle, Stripe, Dodo Payments

Experience

Software Engineer

India

Peoplane

Oct 2023 to Present

- Built and maintained features across multiple products, owning work from architecture through deployment.
- Designed and shipped the **Swabzy MVP in 15 days** (Flutter + TanStack Start + Supabase). The product reached active user adoption within its first week.
- Supported a platform used across **30+ countries**, managing cloud infrastructure to keep uptime reliable and hosting costs down.
- Helped build **FluxMVP**, a Peoplane sub-company helping client companies ship MVPs quickly and cost-effectively.
- Set up and maintained deployment pipelines and infrastructure across products as part of a small early-stage engineering team.

Full Stack Engineer

Remote

Self Employed

Jan 2023 to Sep 2023

- Delivered software development services to **30+ global clients**, handling requirements, architecture, development, and deployment.
- Maintained a **5-star client rating** across all projects by delivering on time and communicating clearly through each build.
- Wrote setup docs and recorded walkthroughs for every handoff, cutting down on post-delivery support requests.

Flutter Developer

India

Microclouds India

Aug 2022 to Dec 2022

- Built and shipped Flutter mobile apps across multiple client projects, integrating REST APIs and Firebase backends.
- Implemented push notifications and messaging using Firebase Cloud Messaging across client apps.
- Built reusable Flutter UI components and state-management patterns that cut setup time on new projects by **20%**.
- Documented internal workflows and project structure to speed up onboarding for other developers on the team.

Projects

Likefolk

<https://www.likefolk.com>

Tech Stack: Flutter, FastAPI, Firebase, Gemini API

Independently designed and built a social platform focused on positive engagement, using Gemini to power content suggestions and Firebase for real-time likes/comments.

Swabzy

<https://www.swabzy.com/>

Tech Stack: Flutter, TanStack Start, Supabase, Paddle

Owned the Swabzy MVP end-to-end (Flutter mobile app, TanStack Start web app, and Paddle billing), shipping in 15 days and reaching active users within the first week.

Afodar

<https://afodar.com/>

Tech Stack: TanStack Start, Supabase, Dodo Payments

Customer retention and workflow automation software for small service businesses. Sends repeat appointment reminders, manages follow-ups, and tracks recurring customer tasks and payments.

FluxMVP

<https://fluxmvp.com>

Tech Stack: Next.js, TanStack Start, FastAPI, Supabase

Helped build and scale FluxMVP, a Peoplane sub-company offering SaaS and MVP development, AI workflows, websites, social media marketing, and SEO for startups and businesses.

Education

B. S. Abdur Rahman Crescent Institute of Science and Technology

Chennai, Tamil Nadu · CGPA: 8.88

BCA, Computer Applications, *Specialization in Information Security and Mobile Development*

2019 to 2022
